

Healthstat Point-of-Care Dispensing Quick Facts

- We DO offer Point-of-Care Dispensing.
- We DO dispense certain generic medications that are prescribed by the Healthstat provider after you have been seen by the provider in the clinic.
- We CAN dispense maintenance medications, if in our formulary, that have previously been prescribed by your PCP. However, you first must be seen by the Healthstat Provider.

Benefits include:

- Increases Convenience - No need to make an extra stop at the pharmacy, Strengthens relationships with patients
 - Increases Patient Satisfaction by providing valuable and desired service
 - Increases Confidentiality - consultations and prescription questions are answered in the privacy of their doctor's office
 - Increases Patient Compliance - 36% of prescriptions are never filled when patients are sent to a pharmacy to fill their prescriptions. However, when patients receive their medications at the point of care, there is no doubt the patient is leaving with their medication.
-
- We are NOT a traditional "pharmacy".
 - We DO NOT fill outside prescriptions.
 - We CANNOT change or alter your current PCP medications without approval from your PCP.

Please note:

In order to comply with all regulations set forth by the Medical Board and Board of Pharmacy, the patient must be seen by the Healthstat Provider before drugs are dispensed.
